

Fellowship in Paediatric Nephrology and Paediatric Renal Transplantation course is a two year course. Students who have completed their MD/DNB in Paediatrics can apply for the course. We have two seats every year. With worldwide increasing knowledge about various renal disorders in children, special training is mandatory to achieve best patient care and outcome. With vision to provide speciality care to these children in remote and interior areas of country, main aim of this course is to provides basic as well as comprehensive training in field of Paediatric nephrology and paediatric renal transplantation. With adequate duration and extensive exposure, the course provides best analytic training, maximum hands on training, and maximum exposure in field of paediatric renal transplantation. Department also conducts regular academic activities, interdepartmental activities and research training.
